DETAILED ACTION

Final Rejection

- I. Rejection of claims 11-26 under 35 USC 112, 2nd paragraph will not be maintained in light of amendment filed 11/12/03. Applicant has deleted the phrase "curative or preventive" from the claims.
- II. Rejection of claims 1-26 under 35 USC 103(a) as being obvious over Latrose on record will not be maintained in light of amendment filed 11/12/03. The language of the claims excludes the 2-imidaziline-5-one compound as a fungicide.

Applicant's arguments filed 11/12/03 have been fully considered but they are not persuasive. See reasons below.

- III. Rejection of claims 1-20,23,24 under 35 USC 102(e) as being anticipated by Oguri on record will be maintained in light of amendment filed 11/12/03 for reasons on record and reasons as follows. New claims 27 and 28 are added to this rejection.

Applicant argues that claim 1 has been amended to include the only instant fungicidal components: BAS490F (A) or SSF-129 (A) and iprodione (B) having a A/B weight ratio between 0.02 and 5. Applicant argues that Oguri's Formulation Examples 7-9 do not specifically teach formula Ia (BAS409) plus iprodione or formula Ic (SSF-129) plus iprodione. Applicant argues that Oguri teaches 21 possible combinations. Applicant argues that instant specification provides synergistic data for the two combinations and that Oguri provides no comparable results. Examiner argues that within the small combination window of 21 possible combinations taught by Oguri's Formulation Examples lie the two instant fungicidal combinations, i.e., (BAS409) plus iprodione and

Art Unit: 1616

(SSF-129) plus iprodione. Because a 21 combination window is considered small, Examiner reiterates that Oguri anticipates the instant combinations. With respect to Applicant's data, Examiner argues that Applicant does not clearly show A plus B synergism, i.e., Applicant does not show results for A alone, B alone and the A plus B combination.

Allowable Subject Matter

Claims 21,22,25,26,29-50 are allowable. The prior art does not teach the instant method comprising the instant ratio of A/B being applied at instant rate of application.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
